

Task 3 - Data Analysis with Pandas

Goal

Demonstrate data analysis skills using Pandas.

Requirements

- Load and inspect a CSV dataset.
- Clean missing or incorrect data.
- Apply filtering, grouping, and aggregation.
- Explain insights in simple words.

Deliverables

1. Notebook (.ipynb) or Python script (.py).
2. Short insight summary.

Suggested GitHub Repository Description

Data Analysis with Pandas – Alfido Tech Internship Task 3. This project demonstrates CSV data loading, cleaning, filtering, grouping, aggregation, and basic data insights.
